HEALTH AND FAMILY WELFARE (SHRI A. RAJA): (a) No Sir.

(b) and (c) A National Filaria Control Programme (NFCP) is already in operation in the country since 1955. Although, operations under the programme have been limited to urban areas, it has been extended to rural areas also since 1994 for management of cases through primary health centres. In urban areas, 206 Filaria Control Units, 199 Filaria clinics and 26 survey units have been in operation for control of disease. The steps taken for control of fiiariasis include:—

— recurrent anti-larval measures;

— using larvicides in the mosquito breeding places;

— anti-parasitic measures by detection of micro-filaria carrier and treatment with diethyl carbamazine (DEC);

— IEC activities for public awareness;

— Management of acute and chronic fiiariasis through referral services;

— Biological control of mosquito breeding through biological agents specially larvivorous fishes;

Further, NFCP has initiated a project in 1997 with single dose annual mass drug therapy in 13 identified districts 7 States namely Andhra Pradesh, Bihar, Uttar Pradesh, West Bengal, Orissa, Tamil Nadu and Kerala,
